The wireless high-speed office at the Hotspot.

Our world – and especially the business world – is becoming increasingly mobile. Today's employees spend more and more time outside the office. This means that simple and rapid access to the Internet and corporate networks is becoming increasingly important when you're on the move.

Public Wireless LAN allows you to make good use of your travelling and waiting times wherever you happen to be – in a hotel, at a train station, at an airport, etc. With your Notebook or pocket PC (e.g. iPaq) you can have simple, fast wireless access to the Internet, to e-mail services and corporate networks if the company supports this.

Swisscom Mobile is continuously setting up new Hotspots with Public Wireless LAN throughout Switzerland.

Hotspots are indicated by this sign:

You can find an up-to-date overview of all Swisscom Mobile Hotspots and Public Wireless LAN tariffs at www.swisscom-mobile.ch/pwlan

In Switzerland you can also find the five Hotspots closest to you by SMS. Enter keyword **WLAN** and send the SMS to number 858. (One query costs CHF 0.90 plus CHF 0.20 for address details.)

The advantages of Public Wireless LAN by Swisscom Mobile.

Fast.

- High-speed access to the Internet and, if supported by your company, to your company data, at transmission speeds of up to 2 Mbit/s.

Simple.

- You have direct access to your data at all Hotspots without a tangle of cables. Simply start your browser and away you go.

Convenient.

- The cost is either conveniently billed to your NATEL® bill or you can use a Value Card.

Now you can also use Public Wireless LAN abroad!

With a Swisscom Mobile NATEL® subscription you can use the Public Wireless LAN sites of our local partners throughout Europe just as quickly and easily as in Switzerland.

swisscom

eurospot

Requirements.

NATEL® subscription from Swisscom Mobile...

- Activating Public Wireless LAN before or with your first Public Wireless LAN session directly over the Internet.
- If your NATEL® number belongs to a corporate account, your company administrator will activate your access.

...or a Value Card.

- Cards with stored credit for 30 minutes, 2 hours, 24 hours or 7 days for customers wishing to use Public Wireless LAN but without a Swisscom Mobile subscription. Time runs without interruption from the first login.
- Value Cards can be purchased at any Hotspot or Swisscom Shop and are valid in Switzerland only.

Hardware.

- Notebook or pocket PC.
- Standard wireless LAN card (IEEE 802.11b). The wireless LAN card is generally already integrated in more recent Notebooks.

Software.

- Internet browser.
- VPN-Virtual Private Network for secure access to the Intranet and company data.
